	Actions/Outcome: no conclusions further discussion needed	
Case 4	Headache inducing variants 2 ATM	Presented by: Katie Snape St Georges Katie.Snape@stgeorges.nhs.uk
	Actions/Outcome: no conclusions further discussion needed	

Meeting Summary

(If relevant)

It was discussed how difficult interpreting these variants are when they are not on the TD and there is no agreed national management. Case by cases decisions could be made but this makes it very difficult when families are seen all over the country.

Further discussion on ways to manage these variants outside the TD has been arranged.

Next meeting details

Date	Thursday 19 th September 2024
Time	12:30 pm-1:45 pm
Theme	Discussion of familial ovarian cancer NICE guidelines
